

SampleAI Meeting Assistant — Privacy Policy

Effective January 2026. Version 3.1.

1. Information We Collect

SampleAI records, transcribes, and summarizes meetings you connect to the service. We collect meeting audio, generated transcripts, participant names and email addresses, calendar metadata, and usage telemetry.

2. How We Use Your Information

We use meeting content to provide the transcription and summarization service. SampleAI may also use customer meeting content, including transcripts, to train and improve our machine learning models. Customers on the Enterprise tier may opt out of model training by written request to their account manager.

3. Data Retention

Meeting transcripts and derived summaries are retained for the life of the account and are not subject to a fixed deletion schedule. We retain this content indefinitely to support product improvement and historical search functionality.

4. Your Rights and Choices

Customers may request deletion of their account data at any time by submitting a request through the in-product privacy console or by emailing privacy@sampleai.example. Verified deletion requests are processed within 30 days.

5. Subprocessors

SampleAI engages the following subprocessors: Amazon Web Services (cloud hosting), Stripe (billing), Twilio (notifications), and a third-party large language model provider for summarization. A current subprocessor list is maintained at sampleai.example/subprocessors.

6. Integrations

With your authorization, SampleAI connects to Google Calendar, Microsoft Outlook, Slack, and Salesforce. The assistant can post summaries to Slack channels and create follow-up tasks in connected systems on your behalf.
